

VillaTosca's Traveling Seminar

The Origins of Beauty

VillaTosca's Traveling Seminar

Contemporary culture has made the voyage a kind of apprenticeship, and travel is a powerful creative stimulus for designers and decision making people.

The Traveling Seminars created by VillaTosca are multidisciplinary experiences that enrich and widen the participants' cultural horizons through a total immersion in selected places and cultures.

VillaTosca's Traveling Seminar

The cultural and environmental frame of the Traveling Seminars creates an 'estrangement', a deviation that involves perception and perspective, geography and culture, that enables the birth of ideas.

In the scientific world, it is well known that "serendipity", or accidental luck, at times allows the researcher to grasp new knowledge in an intuitive and immediate way.

A voyage bears within itself the concrete possibility of illumination which one can reach through lateral thoughts, sensory stimulation and spiritual experiences accomplished within the landscape and the culture.

VillaTosca's Traveling Seminar by boat

Traveling and life on board

Traveling and life on board

Yachting offers high sensations of liberty, mental and ideal freshness. The flow of time and its rhythms, the inner space, and the outer one, offer unforgettable emotions.

At the same time, to be “tasted”, a ship demands an uncommon capacity of adaptation.

Traveling and life on board

Against the huge external spaces and the vastness of the sea and the sky, comes the efficient use of every single inner space.

The acknowledgment of which, since the beginning of the Traveling Seminar, helps to overcome the inevitable correlated small inconveniences.
